Software Engineer Ruby on Rails

Mulhuddart, Dublin, Ireland

Software Product Development

Professional

Apply now

Introduction

As a Software Developer, you'll serve as the last instance before applications are released to the public. You'll create and carry out test plans, research new features, and develop automated tests. We'll need you to have the ability to think creatively and adapt to rapid change, as well as the willingness to learn new things.

Your role and responsibilities

Join Our Team as a Software Developer at IBM!

You'll have the opportunity to make a difference in the way 3scale API Management is developed. You'll gain a complete understanding of various technologies, including Docker, OpenShift by Red Hat, Ruby on Rails, and more. You will make sure our solutions fulfill the highest possible enterprise quality, performance, usability, and supportability criteria.

Required education

None

Preferred education

Bachelor's Degree

Required technical and professional expertise

- Software Development Expertise:

- Software Testing and Development

Working experience with software testing, including familiarity with testing methodologies and techniques. Designing and implementing tests to ensure software products meet quality standards and requirements.

- Automation Integration

Experience with Continuous Integration/Continuous Delivery (CI/CD) pipelines such as Jenkins to streamline testing processes and enhance efficiency.

- Excellent Problem-Solving Skills:

Demonstrated experience in problem-solving, with the ability to tackle complex issues and find effective solutions.

- Collaborative Team Player:

Ability to work seamlessly as part of a global team, contributing to collective goals and fostering a collaborative work environment to ensure the development of robust, scalable, and user-friendly solutions.

Preferred technical and professional experience

- API Management Systems Experience:

Familiarity with API management systems, their configuration and operation.

- Cloud/Container skills:

Familiarity with cloud and container technologies, including Docker, Kubernetes, Red Hat OpenShift, etc.

- Collaborative Software Development:

Familiarity with distributed software development using Git, or a similar system.

ABOUT BUSINESS UNIT

IBM Software infuses core business operations with intelligence—from machine learning to generative AI—to help make organizations more responsive, productive, and resilient. IBM Software helps clients put AI into action now to create real value with trust, speed, and confidence across digital labor, IT automation, application modernization, security, and sustainability. Critical to this is the ability to make use of all data, because AI is only as good as the data that fuels it. In most organizations data is spread across multiple clouds, on premises, in private datacenters, and at the edge. IBM's AI and data platform scales and accelerates the impact of AI with trusted data, and provides leading capabilities to train, tune and deploy AI across business. IBM's hybrid cloud platform is one of the most comprehensive and consistent approach to development, security, and

YOUR LIFE @ IBM

In a world where technology never stands still, we understand that, dedication to our clients success, innovation that matters, and trust and personal responsibility in all our relationships, lives in what we do as IBMers as we strive to be the catalyst that makes the world work better.

Being an IBMer means you'll be able to learn and develop yourself and your career, you'll be encouraged to be courageous and experiment everyday, all whilst having continuous trust and support in an environment where everyone can thrive whatever their personal or professional background.

Our IBMers are growth minded, always staying curious, open to feedback and learning new information and skills to constantly transform themselves and our company. They are trusted to provide on-going feedback to help other IBMers grow, as well as collaborate with colleagues keeping in mind a team focused approach to include different perspectives to drive exceptional outcomes for our customers. The courage our IBMers have to make critical decisions everyday is essential to IBM becoming the catalyst for progress, always embracing challenges with resources they have to hand, a can-do attitude and always striving for an outcome focused approach within everything that they do.

Are you ready to be an IBMer?

ABOUT IBM

IBM's greatest invention is the IBMer. We believe that through the application of intelligence, reason and science, we can improve business, society and the human condition, bringing the power of an open hybrid cloud and AI strategy to life for our clients and partners around the world.

Restlessly reinventing since 1911, we are not only one of the largest corporate organizations in the world, we're also one of the biggest technology and consulting employers, with many of the Fortune 500 companies relying on the IBM Cloud to run their business.

innovator and a force for good in the world.

IBM is proud to be an equal-opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, neurodivergence, age, or other characteristics protected by the applicable law. IBM is also committed to compliance with all fair employment practices regarding citizenship and immigration status.
